### TRADE LIST

#### **Spring**, 1913

CUSTOMERS are requested to state the mode of conveyance by which they desire their trees forwarded. When no route is named, we forward to the best of our judgment, without liability for error or delay.

**RESPONSIBILITY.**—After goods are placed on board cars here, we assume no responsibility for their safe or prompt delivery, or any injury caused by delay in delivery by the transportation company.

ALL CLAIMS must be made upon receipt of goods.

TERMS CASH, on or before delivery to express or railroad agents, unless by special arrangement.

Two hundred and fifty, twenty-five or five of any one variety will be furnished by the thousand, hundred and ten rates, respectively, but single plants of one or more varieties will not be sold at less than 15 cents each, except Vines and Herbaceous Plants, the minimum price of which will be 10 cents each.

PACKING CHARGED EXTRA, but only sufficient to cover cost of time and material consumed in the work.

POST OFFICE ORDERS payable at Dresher P. O., Montgomery Co., Pa.

WESTERN UNION TELEGRAPH, AMBLER, PA. Use Nurserymen's Telegraphic Code or "A B C " Code, 4th edition.

VISITORS are always welcome and should take train at the Reading Terminal, 12th and Market Streets, Philadelphia, for Camp Hill Station, or at Broad Street Station, Pennsylvania R. R., for Fort Hill Station. Be sure that the train stops at these stations.

NOTICE.—It is necessary that you should **TELEPHONE** us (Bell Phone, 226-A Ambler; Keystone Phone, Jenkintown 652-Y), in advance of your coming, so that we can send a carriage to the station for you. Our office is  $2\frac{1}{2}$  miles from either station.

#### CERTIFICATE OF INSPECTION

Our nurseries are inspected several times each year, by inspectors of the Entomological Division of the Department of Agriculture of the State of Pennsylvania, and are free from insect pests and diseases. A certificate of the Department is attached to all shipments, and will also be furnished to customers if desired.

Will W. Jace Deciduous Trees

Several years ago we realized that there would shortly be a demand for a better grade of shade trees than were being commonly sold in nurseries at that time. With this idea in mind we commenced transplanting large blocks of all varieties, selecting only nice, straight, first-class trees for the purpose, discarding any crooked or ill-shaped stock. Time has proven the wisdom of our foresight, and while the demand for this class of stock has been greater than our expectation, our supply has been sufficient to meet the demand, and though our sales last year on these trees were very heavy, we still have a good supply on hand for this season's sales.

Our object is to grow a first-class tree, well rooted, with straight trunk and a nice top, and we spare no expense to produce a tree of this character. All crooked trees are discarded. Every tree we send out is a good tree. We stake all of our trees with long bamboo poles, and in that way we get not only a perfectly straight trunk, but a stem right to the top of the tree. This should be kept in mind when comparing our prices with the "cheap" trees usually offered. Par 10 Par 100

#### Japanese Maples

Why buy cheap imported Japanese Maples, hide-bound stock, poorly rooted, varieties badly mixed up and untrue to name, when you can buy healthy American-grown plants well rooted, vigorous and well-developed tops, guaranteed true to name and at a price very little higher than the imported stuff. All of our Japanese Maples are propagated in our nurseries and are guaranteed true to name.

#### Platanus Orientalis European Plane or Sycamore

One of the fastest growing shade trees, in great demand for street planting. It makes a large tree of regular growth of top.

We have a lot of very fine trees in the sizes quoted in catalogue. Our trees have straight trunks, and are mostly branched five to seven feet from the ground, according to the size of the tree offered.

#### Specimen Oriental Planes

We still have about one hundred specimen Oriental Planes unsold. They are from 15 to 20 feet tall, perfectly straight stems, with trunks 2½ to 3 inch, and 3 to 3½ inch calliper, are branched about 8 feet from the ground. They have been growing 12 feet apart each way and have large well developed heads. They are too large to be packed in bales and can only be shipped in car lots. See prices under head of "Specimen Shade Trees."

#### Tilia Americana-American Linden

The American Linden is one of our best native trees for Avenue or Boulevard planting. It is of rapid growth, attaining large proportions, but with regular symmetrical top. It has good foliage, and the small flowers are very fragrant. It is hardy in all

sections of the United States.

We have a very fine stock of these trees, several times transplanted, with perfectly straight trunks. In the sizes from 2¼ inch and up our trees are regular specimens. The trunks are absolutely straight, with full symmetrical shaped heads, branching from 6 to 7 feet from the ground. So uniform is this lot of trees that they have the appearance of all having been made from one pattern. They are an exceptionally fine lot and the prices of them are very low if the quality of the stock is considered. The illustration on the front page of cover, while not being taken from one of our trees, is so near like them as to convey an accurate description of the trees we offer.

#### Specimen Shade Trees

This is a particularly fine lot of Specimen Shade Trees for planting for immediate results. These trees were transplanted four years ago and set ten by ten feet apart in nursery rows, allowing ample room for top development. They are abundantly supplied with fibrous roots, have good straight trunks and well developed, symmetrical tops. They are mostly branched from six to eight feet from the ground.

When ordering from this list be careful to mention these

"specimen trees."

On account of the height of these trees only orders for carload lots can be taken. They cannot be baled and shipped in less than carload lots.

### **Deciduous Shrubs**

We continually try to impress upon our customers the fact that the mere height of a shrub does not indicate its value, but that its "bushiness" must also be taken into consideration. Shrubs grown closely in nursery rows must necessarily make height, but the "bushiness" is sacrificed. A good, bushy, two to three-feet shrub is worth as much as a "slim" three to four-feet plant, and for results it is worth more.

We grow our shrubs in wide rows and allow plenty of space between the plants in the rows to permit them to develop properly. It costs more to grow shrubs this way than where they are grown closely together, as we cannot plant as many on an acre. In comparing our prices with those of other growers, this fact should be given consid-

Per 10 Per 100

## **Evergreen Shrubs**

#### Buxus Arborescens Pyramid

We have a very fine stock of these Pyramid Box, selected in Holland by a member of our firm. They are full bushy plants, unusually broad at the base and are exceptionally suited for formal planting or for setting in vases.

#### Box Edging

Our Box Edging are nice bushy transplanted plants. The 4 to 5 inch and 6 to 8 inch are the dwarf Box-suffruticosa. The 10 to 12 inch and the 12 to 15 inch are the Arborescens which have been especially grown for edging purposes where a larger edging is needed for immediate effect. Large quantities of these are used every year and we can rarely supply all the demands of our regular trade.

Hybrid Rhododendrons

There are many varieties of Rhododendrons not generally hardy. We handle only such varieties that have proven most satisfactory and which are recognized as "hardy" sorts. The above illustration gives an idea of the bushy character of the plants we offer and are well set with flower buds.

## Evergreens

#### See also Evergreen Shrubs

We feel that we cannot say too much of our evergreens. We give particular care and attention to their culture, transplanting them as frequently as may be necessary in order to secure an abundance of fibrous roots. To this end they are transplanted every two years, and frequently sheared so that they have a good compact and shapely appearance.

All evergreens are dug with ball of earth and the ball sewed into burlap, the cost of which is included in the prices

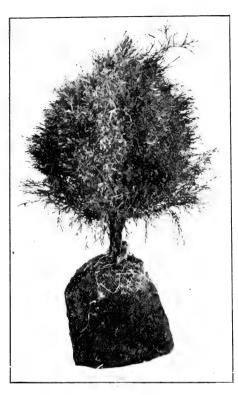

shown in the catalogue.

#### Junipers for Ornamental Planting

Throughout the entire list of Evergreens there are none so useful as the Junipers. First they have the advantage of hardiness, and adaptability to almost all soils and situations. Then they have a character all their own, and the great diversity of color of foliage makes it possible to plant an entire bed or group of them without the use of other species which may not be as hardy or satisfactory. We have gradually been extending our plantings of these Junipers until now we believe we have one of the largest and finest collections in any nursery in this country

#### Retinispora Filifera Aurea

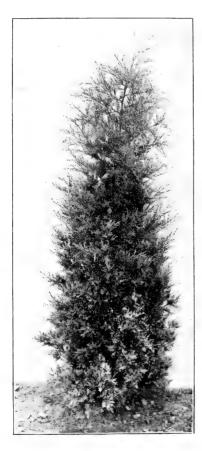

One of the choicest dwarf, golden evergreens. It has graceful, drooping, thread like foliage, and its habit is shapely, and thick in growth. It is largely used as dwarf evergreen for planting in front of ever-green beds, though it likewise makes a very beautiful individual specimen plant. Like all golden foliaged evergreens, it holds its best color along the shore where there is great moisture in the air. We have a very large and complete stock of this valuable plant.

## Juniperus Japonica Aurea Golden Japanese Juniper

A dwarf, golden variety of the Japanese Juniper, having habit of growth similar to the Savin Juniper. It is useful to impart color to a group of other evergreens, or for planting in the foreground of masses. Perfectly hardy and especially adapted to shore planting as the sea air tends to liven the beautiful golden color of its foliage.

### Juniperus Virginiana Glauca Blue Red Cedar

Everyone knows the Native Red Cedar, and there is no evergreen which just fills its place in landscape planting. This is a handsome variety of it, with steel blue foliage. Its hardiness extends to any part of the United States and Canada. We have probably the largest stock of this Blue Cedar in this country.

#### Juniperus Sinensis ArgenteaVariegata

This is one of the hardiest of the Junipers and used largely for massing in evergreen beds. It has a compact and symmetrical habit. The foliage is of light green color, tipped here and there with a yellowish white variegation. We consider this one of the best of the Junipers of this form of growth.

# Vines and Climbers

Our vines are all transplanted plants. We handle them just as we do shrubs, grow them for one year, then transplant them into regular nursery rows; give them plenty of room so that we may get a good bushy well-rooted plant.

# Hardy Herbaceous Perennials Ornamental Grasses and Ferns

Here is a splendid assortment of the very choicest hardy perennials for hardy gardens, borders and formal gardens.

Not small, weak, microscopic specimens, but strong, well-rooted plants, capable of producing good, quick results.

"Results the first season" is our aim always, and the general satisfaction our stock is giving is conclusive proof of its superiority.

July to September, etc., indicates the period of flowering.

# BUDDING KNIVES

#### BUDDING KNIFE "D"

Next to the "Special" here is the knife for budders. Has a cocoa handle, a razor steel blade which closes, and the end of the handle is tapered to form a wedge for raising the bark.

Price, 35c each; 6 for \$2.00

#### BUDDING KNIFE "C"

For anyone wanting a budding knife with a stationary blade, we recommend this knife to contain steel of high temper equal to any razor.

Price, 25c each; 6 for \$1.30

#### THE "HANDY" TREE CALLIPER

#### THE "HANDY JR." TREE CALLIPER

Exactly like the above, but callipers only from 2-16 inch up to 1 inch.

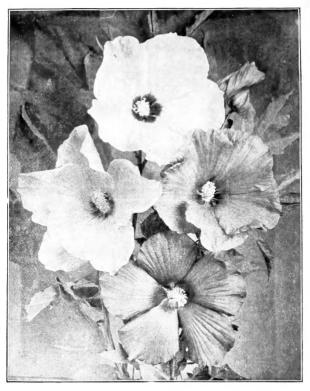

Price, 65 cents each

## "RED STAR" BRAND RAFFIA

"Red Star" Brand Raffia is the best all around grade of Raffia on the market. It is a guaranteed quality of good color and strength and at a most reasonable price. For general purposes it is unequaled. Its sales every year are greater than all other brands.

50 lbs.	and up @	11 cents per l	b.	5 bales and	up @ 81/4	cents pe	r 1b.

# Meehan's Mallow Marvels

HIS plant has become so widely distributed since we introduced it several years ago that it seems unnecessary to discourse upon its merits at this time. It is a pedigree, being a cross between the southern scarlet Hibiscus and our native swamp Mallow.

It makes a vigorous growth—strong roots making a bushy clump five to seven feet in one season and blooming profusely from midsummer to frost. Being an herbaceous plant it dies to the ground in the fall, shooting from the root again the following spring.

The flowers measure from eight to twelve inches in diameter, and are sold in separate colors, in red, pink and white.

The plant is extremely hardy, having been tested and grown in all parts of the United States and Canada.

It grows naturally in moist ground but thrives equally as well in any good, rich soil.
